

JOIN AUSTRALIA'S RENEWABLE ENERGY DELEGATION TO ALL ENERGY 2026

Program dates: 27–29 October 2026

Locations: Adelaide and Melbourne

Industry Overview

Are you planning to come to All Energy in October? Join the delegation we're hosting in partnership with Austrade, the Australian Government's Trade and Investment Commission.

Day 1 Adelaide

The full program begins in Adelaide on Tuesday 27 October. You'll meet two SEC members leading the way in renewable energy:

SA Power Networks, who manage the grid in South Australia. The state regularly achieves 100% renewable energy from wind and solar, and is home to the world's first gigawatt-scale grid to reach 100% renewable energy from behind-the-meter solar. Their engineers will share their experience firsthand.

Tindo Solar, Australia's only manufacturer of solar panels, backed by a 25-year product and performance guarantee. Senior management will take you through their operations.

Day 2-3 Melbourne

From Adelaide, the delegation travels to Melbourne, the events capital of Australia. Our CEO David McElrea will host presentations and networking events with decision-makers, policy influencers, technical experts, and many of SEC's 1000+ members, held in the margins of All Energy, Australia's biggest renewable energy industry event.

The Melbourne program is flexible and can be tailored to individual needs and requests.

Only coming to Melbourne?

That's fine. You can join for days two and three only.

What's included

Suggested hotel accommodation and domestic flights, plus ground transport, hospitality, and meeting arrangements provided by SEC.
