Australian Clean Energy Delegation to South Asia 2026

India — Delhi (Greater Noida), 22–24 October | Bangladesh — Dhaka, 25–27 October 2026.

Delegates joining the India leg are welcome to arrive in Delhi from 21 October, in time for the market briefing at the Australian High Commission from 3.30pm, followed by the official welcome reception at the Australian High Commission, ahead of travelling to Greater Noida for the Expo opening.

About the event

The Australian Government is leading the third Australian delegation of clean energy companies to two of South Asia's most significant growth markets. This program is supported by Team Australia, specifically the Department of Climate Change, Energy, Environment and Water, Austrade's [Accessing New Markets Initiative \(ANMI\)](#) and [State Government partners](#). **The Renewable Energy Council Asia Pacific (RECAP)** is proud to be the delivery partner. This delegation connects Australian exporters with two strategically important South Asian markets in a single, efficient trip. It opens in India, timed to the Renewable Energy India (REI) Expo 2026 in Greater Noida, Delhi (22–24 October), which is one of Asia's largest renewable energy trade platforms and will include an Australian Pavilion presence, before moving to Dhaka, Bangladesh (25–27 October) for a dedicated clean energy mission into one of the region's fastest-emerging markets. Delivered as one integrated regional program, delegates can join both legs or either country's trade mission on its own.

The program brings together export-ready Australian companies across solar PV, battery and energy storage, smart grid, EV infrastructure, electrification and the broader renewable energy ecosystem to engage directly with Indian and Bangladeshi partners, investors and buyers.

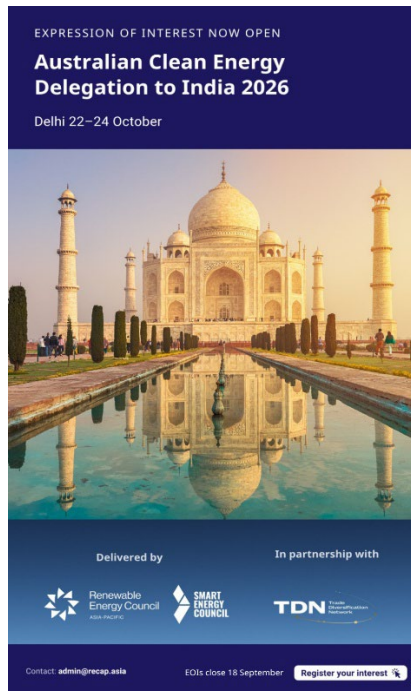

South Asia Trade and Investment Masterclass (India, Bangladesh, Sri Lanka) | Wednesday 7 October 2026, from 12:00pm AEDT

A structured readiness session ahead of the mission, covering market briefings for India, Bangladesh and Sri Lanka, legal and regulatory considerations, and presentations from Australian businesses already succeeding in the region. Delivered online on Wednesday 7 October, 12:00pm AEDT. See page 3 for full details. Interested in attending the Masterclass?

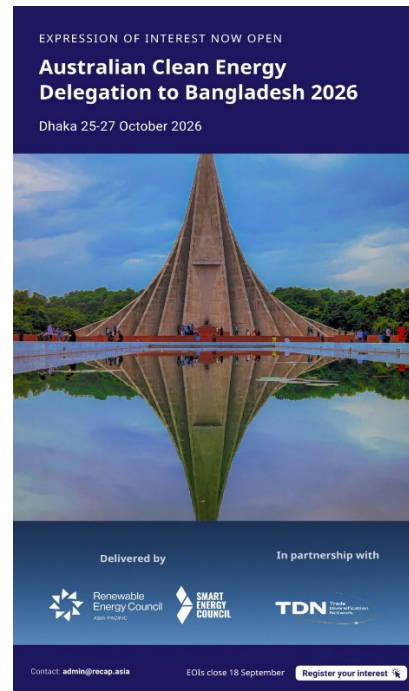

Scroll down to register.

Why you should participate

Hear from John Grimes, CEO, RECAP on why you should participate in these delegations.

Watch the video: [India](#)

Watch the video: [Bangladesh](#)

India and Bangladesh are among the highest-growth clean energy markets in the Asia-Pacific region and strategic priority markets under Australia's trade diversification agenda. India's scale, ambitious renewable targets, and rapid solar and storage deployment sit alongside Bangladesh's immediate opportunities in rooftop solar, distributed energy and grid modernisation; these markets are best accessed through a trusted, government-backed delegation.

By joining the delegation, you will:

- Gain deep insights into the Indian and Bangladeshi clean energy markets, with expert briefings from Austrade's in-market teams
- Engage directly with local partners, investors, EPCs, developers and buyers through curated B2B and business matching sessions
- Showcase your technology and capabilities at the Renewable Energy India Expo — all confirmed delegates will have their company logo on the Australian Pavilion delegation wall, with opportunities for product display and speaking slots subject to availability
- Build commercial partnerships and explore export, distribution and joint-venture opportunities across two markets in one trip
- Participate in industry roundtables, networking engagements and government interactions
- Benefit from the Australian Government's Nation Brand, and the senior leadership of SEC and RECAP leading the delegation.

Who should participate?

This program is designed for export-ready Australian companies across the renewable energy and electrification sectors, including:

- Solar PV technologies, components and manufacturing
- Battery and energy storage solutions (residential, C&I and utility scale)
- Inverters, power electronics and smart grid technologies
- Grid integration, digitalisation and distributed energy resources
- EV charging, e-mobility and electrification infrastructure
- Renewable energy systems, integration and project development
- Clean technology, software, monitoring and digital energy solutions
- Product stewardship including solar and battery re-use and recovery businesses
- Engineering, services and project development
- Training and workforce capability providers
- Research institutions and universities

Key program highlights

Participation in this delegation includes:

• South Asia Trade and Investment Masterclass (India, Bangladesh, Sri Lanka) | Wednesday 7 October 2026, from 12:00pm AEDT

A structured readiness masterclass ahead of departure, delivered online, covering:

- Latest markets briefings from Austrade and RECAP covering the South Asia markets of India, Bangladesh and Sri Lanka
- Insights to key policy movements, regulation and tariff changes
- Opportunity analysis for each country – what the big opportunities for Australian businesses are
- Insights and case studies of Australian businesses which have broken into the South Asia markets
- Presentations from outstanding Australian businesses successfully operating in-country, including a session on battery and solar opportunities in Bangladesh presented by Deakin University, drawing on RECAP and Austrade's Bangladesh clean energy market study
- Making your pitch effective in South Asia
- Legal, financial and regulatory issues for these markets – including sessions on market entry, IP, licensing, incorporation and regulatory compliance, delivered in partnership with leading India-based legal and advisory firms.
- Commercial engagement strategies.

A separate Pre-Departure Briefing will be held for confirmed delegates closer to departure, covering practical trip logistics and final preparation.

• **Australian High Commission Market Briefing & Welcome Reception (21 October)**

The India programme opens with a dedicated market briefing at the Australian High Commission from 3.30pm, followed by an official welcome reception at the Australian High Commission. Delegates are welcome to arrive independently in time for the 3.00-3.30pm start; the group then travels together to Greater Noida later that same evening, ahead of the Expo opening.

• **India — Renewable Energy India Expo (22–24 October)**

Day 1 at the Australian Pavilion focuses on exhibition presence, networking and the Australian stage session. Day 2 features curated B2B matching sessions in a dedicated meeting room, with continued Pavilion presence. The program is designed to maximise commercial outcomes for delegates across both days.

• **Targeted B2B matchmaking**

Pre-arranged meetings with Indian and Bangladeshi partners, investors, buyers, EPCs and developers across the clean energy value chain, facilitated by the SEC/RECAP network.

• **Industry roundtables, networking and government engagement**

Curated Australian delegation networking, industry roundtables and engagement with government, utility and regulatory stakeholders where feasible. Your business will be matched to potential partners in-country.

• **Bangladesh — Dhaka clean energy mission (25–27 October)**

Mission leg into Dhaka with a welcome reception, curated business meetings, workshop with the local industry association to broaden you in country networks, and site and institutional engagement across Bangladesh's emerging rooftop solar, distributed energy and grid modernisation opportunities.

• **Post-mission follow-up support**

Tracking of commercial leads, facilitation of follow-up introductions, and collection of delegate feedback and market insights.

Delegate package

This is a curated delegation focused on quality matchmaking and meaningful engagement. Delegates may join the full integrated program (recommended, best value) or a single leg.

Option	Total cost	What's included
Full Program — India + Bangladesh (recommended)	AUD \$2,100 per delegate (plus GST)	• South Asia Trade and Investment Masterclass (India, Bangladesh, Sri Lanka) • Australian Pavilion presence at REI Expo (logo on delegation logo wall) • Business and delegate bio, picture and logo featured in official delegates directory • Curated B2B matching program • Welcome networking dinner (India) • Industry roundtables and networking • Site visit (India) • Bangladesh clean energy mission • Official Bangladesh Welcome reception • Renewable energy workshop in partnership with Bangladesh Sustainable and Renewable Energy Association • Site visit and/or local research and government engagement • End of mission delegates dinner • Post-mission follow-up support
India only (Delhi, 22–24 Oct)	AUD \$1,500 per delegate (plus GST)	India program elements above (excludes the Bangladesh leg)
Bangladesh only (Dhaka, 25–27 Oct)	AUD \$1,200 per delegate (plus GST)	Bangladesh mission elements (excludes the India / REI Expo leg)

Note: The delegate package fee covers Australian delegation services as set out above. Delegates are responsible for their own flights, accommodation, visa, non-provided meals, and incidentals. A preferred hotel rate will be negotiated and shared with confirmed delegates to book directly. Delegates committing to the program are expected to attend all confirmed activities. All in-country transport to and from mission events will be covered under the program (not including hotel-airport transfers).

Businesses wishing to attend the Renewable Energy India Expo independently and manage their own logistics are welcome to do so. Please contact admin@recap.asia; with copy to vinod.n@austrade.gov.au for more information.

Insights: the India and Bangladesh markets

India is one of the world's fastest-growing renewable energy markets, driven by large-scale solar and storage deployment, ambitious national renewable targets, grid modernisation and rising demand for smart, digitalised energy solutions. The Renewable Energy India Expo is a premier platform for engaging Indian developers, EPCs, distributors and investors.

Bangladesh offers significant emerging opportunities in rooftop solar, distributed and behind-the-meter energy, battery storage and grid modernisation, as the country accelerates its clean energy transition and seeks international technology and investment partners.

Together, the two markets give Australian companies access to both a large, mature-scaling market and a fast-emerging one — in a single, government-backed regional program.

Key market drivers include:

- India's ambitious 500 GW renewable energy target by 2030, driving rapid solar, storage and grid investment
- Strong and growing demand for solar PV, battery storage and smart grid solutions across commercial, industrial and utility sectors
- Expanding electric vehicle and e-mobility ecosystem creating new electrification opportunities
- Grid modernisation and transmission investment opening pathways for Australian technology and services
- Bangladesh's accelerating rooftop solar and distributed energy market, driven by energy access and grid reliability priorities
- Growing demand in Bangladesh for behind-the-meter solar, battery storage and hybrid energy systems
- Both markets actively seeking international technology partnerships, investment and expertise.

India and Bangladesh's combination of scale, growth ambition and open market conditions make them priority destinations for Australian clean energy companies seeking high-growth South and South-East Asian opportunities.
